

Profile

Third-year IT student at EPITECH Mulhouse with hands-on frontend experience in production. Completed a 5-month internship at AkorD on **Kare**, a SaaS digitalizing fire-safety registers for buildings open to the public (ERP), where I shipped major UI features and led several end-to-end refactors in React and TypeScript. Looking for a development internship for my third year (April – August 2026).

Employment History

Aug. – Dec. 2025	Frontend Developer Intern, AkorD, Mulhouse. - Contributed to Kare, a fire-safety register SaaS, in a 7-person product team on a TypeScript monorepo using Domain-Driven Design. - Shipped major UI work: public landing page (kare-app.fr), reusable attachment component with PDF / .eml support, mobile technician intervention flows, and AI anomaly-extraction interface. - Rebuilt key Cypress regression tests and supported production delivery through reviews, bug fixes, hotfixes, and the Oskare → Kare rebrand. Stack: React, TypeScript, Ant Design, Cypress.
2026 – 2027	Assistant EPITECH Région (AER), EPITECH Mulhouse. - Mentoring first-year and second-year students through C / C++ projects: code reviews, debugging support, architecture guidance, and methodology follow-up. - Evaluating projects and reviews against EPITECH criteria, with structured technical feedback on correctness, maintainability, and rigor. - Running “Coding Clubs”, programming initiation workshops for high-schoolers; first hands-on teaching experience.

Personal & Academic Projects

2024	EPITECH Game Jam — “Illusion” (winning entry). Team of 6, 3 days to deliver a video game on the theme “Illusion”. Won the event.
2025	BaselHack 2025 — Hackathon project. Team project built during BaselHack 2025, we chose the Endress+Hauser challenge (a tool to simplify management by generating concensuses in teams).
2026	Animap — Mulhouse Zoo collaboration (winning entry). Team of 4. Visitor-experience web app: interactive map, GPS routing, Augmented Reality experience, AI chatbot. Won the event.
2026	Zappy — Network Game Platform (EPITECH). Team project with three binaries: C++ server managing a real-time game world and TCP protocol, graphical client, and autonomous AI player. Focus on networking, event scheduling, multi-client state synchronization, and clean modular architecture.

Education

2021 – 2024	Lycée Jeanne d’Arc, Mulhouse. General Baccalaureate with honors (“Mention Bien”). One academic year of study in England.
2024 – Present	EPITECH Mulhouse, Programme Grande École. Information Technology Expert diploma (Master’s level, 5 years). Currently 3rd year.

Skills

Languages	TypeScript, JavaScript, C, C++, C#, Python, Rust (basics).
Frontend & Web	React, Ant Design, HTML / CSS, REST APIs, mobile-responsive UI.
Backend basics	Node.js, SQLite, ApiDog monorepo, Domain-Driven Design.
Testing & Tooling	Cypress, systematic code reviews, CI-gated deploys, Git, GitHub, Jira, Agile.
Graphics & Game	Unity (C#), C++ raytracing, SFML.
Spoken languages	French (native), English (C1, Cambridge FCE B2 — one academic year in England).
Interests	Software development, street & nature photography, bouldering.
